<https://drive.google.com/drive/folders/0B75b5xYLjSSNdHlIS2EyMGh6dzQ?usp=sharing> QUESTION 86 Scenario: A Citrix Engineer has implemented a multi-zone environment with the following characteristics:- One Primary Zone in New York, one Satellite Zone in San Francisco and another in Singapore- Microsoft Word Application available in all zones- New York zone configured as the App Home for Microsoft Word- San Francisco zone configured as the User Home for User1 User1 is currently located in San Francisco and clicks the icon for Microsoft in Receiver. User1 currently has a disconnected session for Microsoft Word in Singapore. What will the Receiver do in this scenario? A. Reconnected to the existing disconnected session in Singapore. B.

Launch a new session in New York. C. Launch a new session in Singapore. D. Launch a new session in San Francisco. **Answer: B** QUESTION 87 Scenario: A Citrix Engineer created Desktop OS machines with App Layering and assigned them to helpdesk users. A user from the helpdesk department logs on to the desktop to test it. Which component is responsible for finding a program or file and returned it to the operating system when the user makes a request? A. Windows Operating system B. Composite file system C.

Platform layer D. Personalization layer **Answer: B** QUESTION 88 For which three reasons are connectors needed to create layers? (Choose three.) A. To export an elastic application layer B. To import a prepared OS image C. To deploy a packaging disk D.

To import a prepared application layer E. To publish a layered image **Answer: BCE** QUESTION 89 How can a Citrix Engineer prevent access to certain local drives on Virtual Delivery Agents (VDAs) to all users using Workspace Environment Management (WEM)? A. Set the "Hide Specified Drives from Explorer" option setting in the environmental settings of WEM. B. Configure the Restrict Drives from the Explorer setting in the environmental setting of WEM. C. Import the Infrastructure Services server ADMX template to Group Policy and hide the local drives. D. Use the Management Agent Host Configuration ADMX template to restrict the local drives. **Answer: B**

QUESTION 90 Scenario: A Citrix Engineer is designing a multi-server Provisioning Services solution. The solution must be highly available and minimize the risk of vDisk inconsistency. Which configuration can the engineer implement to meet the needs of this design? A. Configure a separate local vDisk Store on two Provisioning Services on different sites and use the export/import feature to replicate the vDisks. B. Configure a separate local vDisk Store on each Provisioning Services server and use rsync for Windows to replicate the vDisks. C. Configure vDisk Store on a Common Internet File System (CIFS) share on a Network Attached Storage (NAS) for each Provisioning Services server. D. Create the Provisioning Services vDisk Store on a configured, single Distributed File System (DFS) namespace. **Answer: C**

QUESTION 91 Scenario: A Citrix Engineer is managing a XenApp and XenDesktop environment that has been built with the following site architecture:- Site A has been created in datacenter A.- Site B has been created in datacenter B. A NetScaler Gateway has been set up in each datacenter. Each Gateway has access to both Sites. The StoreFront server group in each Site is configured to enumerate resources from both Sites. Application D is available in Site B only. Optimal Gateway Routing has been configured so that the published resources in each Site are mapped to the local Gateway. A user located near datacenter A logs in through NetScaler Gateway and attempts to launch Application B. Which behavior is expected in this scenario? A. Resource enumeration occurs via Gateway A; the HDX connection is established using Gateway B. B. Resource enumeration and the HDX connection are established using gateway A. C. Resource enumeration and the HDX connection are established using Gateway B. D. Resource enumeration occurs via Gateway B; the HDX connection is established using Gateway **Answer: A**

QUESTION 92 Which three privileges must the service user account have to run the Stream and SOAP services in Provisioning Services? (Choose three.) A. Access to Program Files Citrix Provisioning Services B. Run as service C. Registry write access D. read and write access to any vDisk location E. Access to C:\Windows\System32 **Answer: ABD**

QUESTION 93 Which two requirements are needed for the target devices contained in a device collection to function successfully? (Choose two.) A. All target devices in the device collection must be accessible to the same user and/or user groups. B. All target devices in the device collection must have an Active Directory machine account which is managed by Provisioning Services. C. All target devices in the device collection must be located in the same XenApp and XenDesktop Site. D. All target devices in the device collection must be assigned at least one vDisk. E. All target devices in the device collection must be running from the same Operating System. **Answer: BD**

QUESTION 94 Which configuration will lower the bandwidth requirements for HDX user sessions? A. Enable the Visual quality ?Always lossless Citrix policy setting. B. Configure the Workspace Environment management (WEM) System Optimization Setting. C. create Thinwire 8-bit mode registry key. D. Disable Windows Media Redirection. **Answer: D**

QUESTION 95 A Citrix Engineer must change the write cache method from 'Cache on device hard drive' to

`Cache in device RAM with overflow on hard disk'.The engineer needs to check the size of the_____ to determine the current write cache size. (Choose the correct option to complete the sentence.)A. .writecache file in the vDisk storeB. local page fileC. .vdiskcache file on the device hard diskD. RAM and page file combined in Task Manager

Answer: CQUESTION 96Which three tasks can a Device Administrator, but NOT a Device Operator, perform? (Choose three.)A. View vDisk properties.B. Edit target device properties.C. Assign and remove vDisks from a device.D. Perform power management actions on target devices.E. Send messages to target devices.
